TOLFTE BANDETS INNEHÅLL

		Sid.
1.	CLAESSON, S., and LINDQVIST, L., A fast photolysis flash lamp for very high light intensities	1– 8
2.	LINDGREN, P.-H., Some notes on the intensity distribution along the X-ray interference circles for some simple types of orientation in polycrystalline specimens	9– 32
3.	HOLMBERG, B., Zur Kenntnis der Membranbestandteile der Moose. (Ligninuntersuchungen XIX)	33– 39
4.	HOLMBERG, B., Fichtenlignine und Thioglykolsäure. (Ligninuntersuchungen XX)	41– 61
5.	CLAESON, G., 3-Thiophanecarboxylic acid	63– 67
6.	ÖSTLUND, H. G., Carbon dioxide proportional counting for natural radiocarbon measurements	69– 78
7.	STÄLLBERG, G., Preparation of racemic and optically active half-esters of methylsuccinic acid by oxidation of esters of methylallylacetic acids	79– 84
8.	VON EULER, H., HASSELQUIST, H., und WÅHLSTAM, H., Amadori-Produkte, Reduktonate und Pseudo-Reduktone	85– 93
9.	STÄLLBERG, G., Synthesis and configuration of the enantiomeric β-bromoisobutyric acids	95– 98
10.	BLOMBÄCK, B., On the properties of fibrinogen and fibrin	99–113
11.	GRONOWITZ, S., Some aspects of the preparation of Grignard reagents by "entrainment"	115–122
12.	WIDEQVIST, S., The esterification of *l*-menthol in concentrated formic acid	123–129
13.	STÄLLBERG, G., Configuration of optically active β,β'-dithiodiisobutyric acid and β,β'-thiodiisobutyric acid	131–136
14.	BLOMBÄCK, B., and LAURENT, T. C., N-terminal and light-scattering studies on fibrinogen and its transformation to fibrin	137–146
15.	VON EULER, H., und HASSELQUIST, H., Reduktionsfähigkeit von Mono-Enolen und Chlor-Enolen	147–151
16.	STÄLLBERG, G., Synthesis of the optically active forms of 2-methyloctadecanoic acid and 2,5-dimethyladipic acid from the enantiomers of methyl 2-methyl-3-carboxypropanoate	153–159
17.	WESTMAN, L., Resolution and configuration of 1.2.3.4-tetrahydro-1-naphtoic acid	161–166
18.	WESTMAN, L., Resolution and configuration of α-phenyladipic acid	167–171
19.	BLOMBÄCK, B., and VESTERMARK, A., Isolation of fibrino-peptides by chromatography	173–182
20.	JOSEFSSON, L., N,O-Peptidyl shift in ribonuclease causing a reversible enzymatic inactivation	183–193
21.	JOSEFSSON, L., Studies on the sedimentation, viscosity and rotatory properties of ribonuclease during N,O-peptidyl shift	195–202

22. Myrbäck, K., and Willstaedt, E., Studies on yeast invertase. II. Inactivation of invertase by iodine and by heavy metal ions 203–218
23. Nilsson, R. O., On the complex formation between silver and thiosulphate ions. I. Solubility measurements 219–231
24. Bergson, G., Molecular orbital treatment of the 3 $p\,\pi$ interaction in five-membered cyclic disulphides 233–238
25. Gronowitz, S., 3-Substituted thiophenes. Preparation and metalation of 3-methoxythiophene 239–246
26. Krogh-Moe, J., Some new compounds in the system cesium oxide-boron oxide 247–249
27. Sjöberg, B., Stereochemical studies. III. Resolution and configuration of α-(3-indolyl)-propionic acid 251–258
28. von Euler, H., Hasselquist, H., and Wåhlstam, H., Neue Amino- und Amino-Chlor-Derivate des *p*- und *o*-Xylols 259–265
29. Lindenfors, S., On the *trans-cis* isomerization of cinnamic acids by the action of ultraviolet rays. 3-Chloro-*cis*-cinnamic acid and 3.5-dichloro--*cis*-cinnamic acid 267–279
30. Stein, M. L., und von Euler, H., Verlauf der Bildung und Umwandlung von Reduktonen in alkalischer Lösung 281–286
31. Tammelin, L.-E., Organophosphorylcholines and cholinesterases 287–298
32. Blombäck, B., and Yamashina, I., On the N-terminal amino acids in fibrinogen and fibrin 299–319
33. Blombäck, B., Studies on the action of thrombic enzymes on bovine fibrinogen as measured by N-terminal analysis 321–335
34. Nilsson, R. O., On the complex formation between silver and thiosulphate ions. II. Potentiometric measurements 337–370
35. Nilsson, R. O., The complex formation between thallium(I) ions and thiosulphate ions 371–385
36. Blombäck, M., Purification of antihemophilic globulin. I. Some studies on the stability of the antihemophilic globulin activity in fraction I-0 and a method for its partial separation from fibrinogen 387–396
37. Öhrn, O. E., Precision viscometry of extremely dilute solutions of high polymers 397–436
38. Lindgren, P. H., X-ray orientation investigations on some Swedish cellulose materials 437–452
39. Boman, H. G., Purification of prostatic acid phosphatase 453–465
40. Boman, H. G., A deoxyribonuclease from human prostatic tissue 467–474
41. Krogh-Moe, J., The infrared spectra of some vitreous and crystalline borates 475–480
42. Friberg, U., Uptake of radiosulfate and radiophosphate in various tissues of normal and vitamin C-deficient guinea pigs 481–499
43. Friberg, U., Role of inanition in the reduced synthesis of chondroitinsulfuric acid in guinea pig rib cartilage in vitamin C deficiency 501–511
44. Nilsson, R. O., An X-ray investigation of the structure of silver iodide, silver thiocyanate, and silver thiosulphate complexes in solution 513–531
45. Gronowitz, S., 3-Substituted thiophenes. 3-Thienylsubstituted ketones . 533–545
46. Fredga, A., Studies on synthetic growth substances. X. The enantiomorphs of benznorcaradiene-carboxylic acid 547–551

47. von Euler, H., und Hasselquist, H., Neue Amino- und Nitro-Chinolin-Derivate und N-Oxyde 553–557
48. von Euler, H., und Hasselquist, H., Zur Chemie der N-Oxyde 559–564
49. Sjöberg, B., Stereochemical studies. IV. The enantiomers of α-(2-thianaphthenyl)-propionic acid 565–571
50. Sjöberg, B., Stereochemical studies. V. The enantiomers of α-(4-methyl-1-naphthyl)-propionic acid 573–579
51. Berggård, I., and Odin, L., Studies on the transformation and degradation of sialic acids in aqueous solution 581–595
